

Board Connect
Release Notes V2

Board Connect – V2.0 Release Notes:

January 21, 2021

Board Connect V2 is a major release comprising of a completely new user interface, and many new capabilities added to the system.

What's new:

- New User Interface across the entire solution including mobile and table
- Microsoft Teams themes support; Board Connect now supports all three Microsoft themes including Light, Dark, High contrast
- Board Members can respond directly to the meeting invitation from Board Connect
- Voting control now added to Board Connect; Meeting owners can now create a poll and assign the poll to the team, board members, or associate to a meeting
- Mark attendance component now supports three options, attended in person, attended via teleconference, did not attend
- Meeting minutes; when a meeting is created a corresponding OneNote section is created, when an agenda item is created a corresponding OneNote page is created
- Templates moved to configuration page
- Geo location; When installing Board Connect, you can now choose what data centre Board Connect should be hosted in. We are currently only hosting out of Australia Southeast, however – will be bringing on many data centres in the next two months
- Performance optimizations, bugfixes
